PRODUCT INFORMATION **PLANKS**

**GRADINGS****Select**

Typically, select grade has no knots or these will be of minimal size of max 5mm. No sapwood. There will

be a relatively small amount of colour variation in the timber itself.

**Natur**

Typically, this grade will have a mix of almost select boards with other planks which have more pin knots

and knots up to 30 mm size, filled knots max 30 mm. Expect some variation in tone from heartwood.

Mainly no sapwood or these will be of minimal defects, if any at all. However outside sapwood is allowed

15% length from the width.

**Classic**

Classic Grade floors show the natural variation of timber without allowing some of the more characterful

features in more rustic grades. Planks with very few knots will be mixed with some planks containing larger

knots up to 35 mm and filled knots up to 20 mm. Mainly no sapwood or these will be of minimal defects,

if any at all. Where filler is used its colour is carefully selected to complement the wood rather than to

match it exactly, and the colour of the filler may vary from batch to batch.

**Character**

Typically, character grade allows a wider range of colour variation. Sound knots are larger and unlimited,

filled knots up to 50 mm and you should expect checks (cracks across the growth ring) and possibly some end shake (cracks between the rings). Filler will be used, the colour of which is carefully selected

to complement the wood rather than to match it exactly, and it may vary from batch to batch. Outside

sapwood is allowed 30% length from the width.
